

UCT-A A14

IN THE CLAIMS

Please amend the claims as indicated by the amended claim set below.

1. - 54. (Canceled)

55. (Currently Amended) A toner particle adapted for use in electrostatic image formation comprising:

a polymer; and

flakes of metal ~~gold or silver~~ dispersed in the polymer,

wherein the flakes of metal have a dimension greater than 4 micrometers.

56. (Currently Amended) A toner particle according to claim 55 wherein the flakes of metal have a dimension greater than 6 ~~micrometers~~ micrometers.

57. (Previously Presented) A toner particle according to claim 55 or claim 56, wherein the flakes comprise gold.

58. (Previously Presented) A toner particle according to claim 55 or claim 56, wherein the flakes comprise silver.

59. - 60. (Canceled)

61. (Previously Presented) A toner particle according to claim 55 or claim 56, wherein the polymer is a low molecular weight ionomer.

62. (Original) A toner particle according to claim 57 wherein the polymer is a low molecular weight ionomer.

63. (Original) A toner particle according to claim 58 wherein the polymer is a low molecular weight ionomer.

64. (Canceled)

UCT-A A14

65. (Previously presented) An electrified toner particle according to claim 55 or claim 56.
66. (Original) An electrified toner particle according to claim 57.
67. (Original) An electrified toner particle according to claim 58.
68. (Canceled)
69. (Previously Presented) A liquid toner comprising:
a plurality of toner particles according to claim 55 or claim 56; and
a carrier liquid.
70. (Original) A liquid toner comprising:
a plurality of toner particles according to claim 57; and
a carrier liquid.
71. (Original) A liquid toner comprising:
a plurality of toner particles according to claim 58; and
a carrier liquid.
72. (Canceled)
73. (Original) A printed image printed with a process utilizing a liquid toner according to claim 69.
74. (Original) A printed image printed with a process utilizing a liquid toner according to claim 70.
75. (Original) A printed image printed with a process utilizing a liquid toner according to claim 71.
76. (Canceled)

UCT-A A14

77. (Previously Presented) A mixture containing a plurality of toner particles according to claim 55 or claim 56, wherein the particles have a median particle size of between 8.2 and 18.6 microns.

78. (Previously Presented) A mixture containing a plurality of toner particles according to claim 57 wherein the particles have a median particle size of between 8.2 and 18.6 microns.

79. (Previously Presented) A mixture containing a plurality of toner particles according to claim 58 wherein the particles have a median particle size of between 8.2 and 18.6 microns.

80. (Previously Presented) A liquid toner according to claim 69 wherein the particles have a median particle size of between 8.2 and 18.6 microns.

81. (Previously Presented) A liquid toner according to claim 70 wherein the particles have a median particle size of between 8.2 and 18.6 microns.

82. (Previously Presented) A liquid toner according to claim 71 wherein the particles have a median particle size of between 8.2 and 18.6 microns.
